

My father, Ken Thompson loved his children: The Scars of Family Court Battles

By Trena Thompson

Ken Thompson, My dad, hero and best friend died of a myocardial infraction, which is a technical term for a heart attack, but I think it really is as simple as calling it a broken heart inflicted by flawed family law and a completely bias and unfair system.

My dad was treated like a walking ATM, made possible by using me as a weapon against him in court documents. When he stood up for himself and his rights to see his children he was unfairly labeled as mentally ill by lawyers to discredit him in the courts perspective.

I personally don't appreciate that I was being used to smear his charter and to serve the financial interest of my mom and her lawyers. I demand this be investigated and charges be laid for fraud and child abuse. In order to heal and move forward with my life I need these facts

validated and for justice to prevail for my dad so he can finally rest in peace. My dad deserves to be remembered for the man he truly was loving, compassionate, honourable and dependable. I won't give up this fight until perspectives stop being perverted and twisted to fit the selfish needs of others.

I have well over 500 plus documents to upload and prove my 'allegations', my dad was a very smart man who slipped his court files into my files before he passed without my knowledge and I believe he did so for a reason.

Flawed Family Law Kills

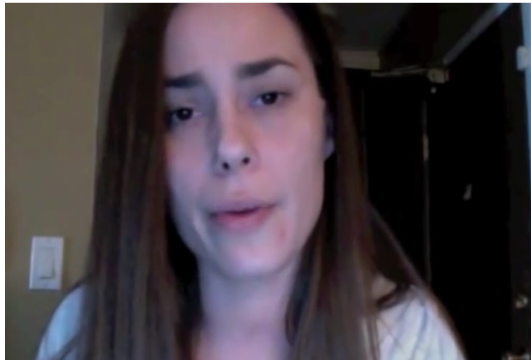

Eight years after his death in 2012 I found them when I was looking for documents for my own case. I couldn't believe it, nor could I believe what I was reading - as the child in this case I have been trying to bring attention to the violation of rights and crimes committed against dad and myself since his death, however until now I only knew what I remembered and anyone I talked to would say sorry it's hearsay. Now that I have all the files and proof of fraud perjury and abuse etc. professionals who hold the positional power to do something about it choose to ignore, minimize, re-victimize me, in turn for whatever reason they keep turning a blind eye to my evidence.

As the child of this case I deserve to be heard and I will not stop sharing my story and dads documents until someone listens and does something about this mess. I am unable to take back my life and truly heal until someone listens, I'm begging anyone and everyone to help me obtain true justice. I hope and pray this case will be used as an example to the flaws in the current system and how it enables abuse on children, which means this system is not truly working in the best interest of any child.

It's pretty sad that abused animals have more rights and support than that of a abused child. Psychological manipulation of a child is the most damaging kind of abuse a child can endure and it needs to stop being enabled by the courts.

List of legal parties involved in my parent's case

1. *Blake Morrison - Dads Lawyer > Retired*
